

Data by Four

from data analysis to submission

**Data by Four is *the* flexible, no-nonsense Dutch CRO,
ready to process *your* clinical study data**

We embrace the CDISC process:

- CDISC-expertise, including SDTM, ADaM, and define.xml
- CDISC data validation and reviewer's guides
- Complete FDA-compliant output CDISC data packages

We are confident in statistics:

- Our registered bio-statistician understands *your* challenges
- Creation of the statistical analysis plan (SAP)
- Offering mock table overviews

We create ready-to-use output documents:

- Tables, Listings, and Figures (TLFs)
- Fully bookmarked and navigable output in PDF and RTF for MS Word
- Clinical study report (CSR) integrable TLFs

We move with the course of the study:

- Data safety monitoring board (DSMB) meetings
- Data review meetings (DRM) for database locks (DBL)
- Consulting in data-efficiency from collection to reviewer-ready

We have a high standard on quality:

- Using state-of-the-art tools in current SAS and R software
- Offering quality control (QC)
- Delivering timely

Contact us today for *your* next clinical study!
